The Aral Salt Room.

Aral - *Named after the Russian region famed for its Salt Lake.*

Aachen Wellness design and build bespoke Dry Salt Chambers for both the domestic and commercial market; these feature rooms can be designed to any shape or size to maximise the space available.

This feature room mirrors the climate conditions experienced in salt mines and caves with the walls and ceiling finished in crystalline pure salt. The purpose of the room is to provide Halotherapy, a medication free treatment used widely in eastern Europe for relief of such conditions as Asthma, Psoriasis, Dermatitis and Bronchitis. A fine spray of salt is pneumatically introduced into the chamber, generating a negative charge to the particles, further aiding relief from symptoms.

The "Aral Salt Chamber" consists of therapeutic fibre optic colour changing lights and a choice of aroma essences. The loungers are heated to a pre-determined temperature and to complete this relaxing experience music can also be introduced to the chamber.
